

D DAWOOD UNIVERSITY OF ENGINEERING AND TECHNOLOGY

CLASS TEST

Department	Cyber Security
Roll Number	25F-CY-074
Subject	Communication skills
Date	11-3-2026
Time	1 hour
Contact No. Cell	

Q:1 Discuss the Seven C's of Effective communication.

Completeness goal: To eliminate the need for follow-up questions by providing the full picture.

Clarity goal: To prevent confusion by using simple language and a logical flow.

Consideration goal: To build a connection by tailoring the tone and content to the receiver's needs.

Conciseness goal: To save time and keep the reader engaged by removing "filler" content.

Courtesy goal: To strengthen professional relationships by being polite and unbiased.

Correctness goal: To maintain your reputation and authority through error free communication. **Concreteness goal:** To build confidence and eliminate "guesswork" by using solid data and examples.

Q:2 Why memo is used outside the organization? Explain

Ans: Organizations often use a "Memo of Understanding" to record agreed-upon terms between two different companies before a formal contract is signed. Because memos are structured with a clear "To, From, Date, Subject" header, they serve as a better "paper trail" for legal or audit purposes than a standard letter. A memo format is sometimes used to deliver short, factual reports to external stakeholders (like investors or consultants) who need data without the flowery language of a formal letter.

Q:3 Define verbal communication and its importance. Discuss different presentation techniques and its benefits with example.

Definition: Verbal communication is the primary tool for sharing information. It is crucial because it allows for **nuance** (tone of voice) and **speed**, preventing the delays often found in non-verbal exchanges.

The "Rule of Three": Limiting your main points to just three key areas.

Benefit: Prevents information overload; the human brain processes trios very effectively.

Example: A salesperson pitching a product based on **Speed, Quality, and Price**.

Vocal Variety: Changing pitch, volume, and pace during a speech.

Benefit: Keeps the audience awake and emphasizes the most important points.

Example: Lowering your voice to a whisper to share a "secret" tip, then increasing volume for a "call to action."

The Demonstrative Technique: Physically showing how something works.

Benefit: Builds high levels of trust and proves "proof of concept."

Example: Steve Jobs pulling the first MacBook Air out of a manila envelope to prove how thin it was.

Q:4 What are the principles of effective communication, and how do they impact various aspects of personal and professional life?

Principle of Adequacy: Providing just enough information—not too little (confusing) and not too much (overwhelming). This manages **cognitive load**. It prevents "information fatigue" in the workplace and ensures you don't overwhelm friends with unnecessary drama.

Principle of Consistency: Ensuring your verbal message matches your non-verbal cues (body language). This builds **Integrity**. If a manager says "I'm open to ideas" while crossing their arms, they lose trust. In personal life, it ensures your sincerity is felt.

Principle of Timeliness: Communicating at the right moment. Delivering bad news or critical feedback at the wrong time can destroy a relationship or a business deal. Doing it timely allows for **damage control**.

Q:5 Explain some guidelines for practicing Eye-Contact.

1)The Triangle Method: If looking directly into someone's pupils feels too intense, look at an imaginary triangle on their face—specifically, the **space between the eyes and the bridge of the nose**. To the observer, it looks exactly like eye contact.

2)Scanning the Room: During a presentation, don't just look at one "safe" person. Mentally divide the room into sections and make brief eye contact with one person in each section to make the whole audience feel included.

3)The "Nod and Lock" Technique: When someone else is speaking, lock eyes briefly and give a small nod. This confirms you are processing their verbal message without you having to say a word.

Q:6 Feedback is an important component of communication. Explain

Feedback highlights strengths and identifies areas for improvement. It is the primary tool for learning and professional development. When employees or students receive constructive feedback, they feel their work is being noticed. This increases their "buy-in" and morale. Many

workplace conflicts arise from simple misunderstandings. Frequent feedback sessions allow these "friction points" to be discussed and resolved before they escalate.

Q:7 Communication is the lifeblood of a business organization.

Employee Motivation meaning when staff are kept informed about company goals and their own performance, they feel valued and engaged. Poor communication leads to rumors and low morale. **Conflict Resolution** friction is inevitable in business. Open channels of communication allow for grievances to be aired and resolved before they disrupt the workplace. **Building a Brand Image** Communication isn't just internal. How a company talks to its customers and the public determines its reputation and long-term survival in the market.

Q:8 What is the difference between hearing and listening in communication?

Hearing is a Faculty almost everyone is born with the ability to hear; it is a basic human sense. **Listening is a Skill** listening must be learned and practiced. It involves "Active Listening" techniques, such as maintaining eye contact, nodding, and asking clarifying questions.

Example: Imagine a student sitting in a classroom. They **hear** the teacher's voice as a constant hum of sound, but they are only **listening** when they actually grasp the lesson and can take notes on the concepts.

Q:9 Why is listening considered essential for effective communication in both personal and professional settings?

Reducing Errors in a business organization, poor listening leads to missed deadlines and incorrect work. Effective listening ensures that instructions are understood correctly the first time. **Informed Decision Making** leaders cannot lead in a vacuum. By listening to feedback from "the front lines," managers can make smarter, data-driven decisions. **Learning and Growth** you cannot learn while you are talking. Listening is the primary way we acquire new skills, absorb different perspectives, and grow both personally and professionally.

Q:10 Why is attentive listening especially important when hearing public announcements at places like airports or railway stations?

Combating "Noise" public hubs are filled with physical noise (engines, crowds) and psychological noise (travel stress). Attentive listening is required to filter out these distractions

to "decode" the message. **One-Way Communication** unlike a phone call, you cannot ask a public address system to "repeat that." Because there is no immediate feedback loop, the burden of accuracy falls entirely on the listener's first attempt. **Technical Distortion** sound systems in large halls often have echoes or distortion. Attentive listening helps the brain piece together fragmented words to understand the full context.

Q:11 What is the key difference between a letter and a memo in office communication?

Q:12 Why is clarity of voice important in telephone communication?

Q: 13 What are the three main parts of an essay?

Q: 14 How does précis writing differ from summarizing?

Q:15 What is the purpose of note-making during lectures or reading?

Q:16 You are the IT Manager. Write a memo to all employees informing them about scheduled system maintenance on Saturday from 9 AM to 5 PM, during which email services will be unavailable.

Q:17 Draw a process diagram of communication.

Q:18 Prepare a resume & covering letter applying for the post of technical manager in a software company.
