

Lab 10

Introduction to Internet & Web Browser

Objective:

- To understand the basic concepts of the Internet.
- To learn about different types of web browsers.
- To explore basic browser features such as address bar, tabs, history, bookmarks, and settings.
- To learn how to browse websites and perform an online search

Theory:

The Internet is a global network of interconnected computers that allows users to communicate, share information, and access online services. It uses standard communication protocols (such as TCP/IP) to transfer data between devices.

A web browser is a software application that allows users to access and view webpages on the internet. Common browsers include Google Chrome, Mozilla Firefox, Microsoft Edge, Safari, etc. A browser sends requests to web servers using the HTTP/HTTPS protocol and displays the received webpages.

Browsers provide features such as:

- Address Bar: Enter website URLs
- Tabs: Open multiple pages simultaneously
- History: View previously visited websites
- Bookmarks/Favorites: Save important websites
- Downloads: Manage downloaded files
- Extensions/Add-ons: Add extra functionality
-

The experiment helps students understand how to use the internet effectively and navigate webpages using a browser.

Requirements

- Computer or Laptop
- Internet connection
- Any web browser (Chrome, Firefox, Edge, etc.)

Procedure

1. Turn on the computer and connect to the internet.
2. Open a web browser installed on the system.
3. Type a URL (e.g., www.example.com) in the address bar and press Enter.
4. Observe how the webpage loads from a web server.
5. Open multiple websites using tabs.
6. Use the search engine (Google, Bing, etc.) to search for information.
7. Open browser settings and explore options like privacy, history, and downloads.
8. Bookmark a webpage and view saved bookmarks.

Observations

- Browser successfully accessed websites.
- User can open multiple tabs and navigate between them.
- Search engine provided results based on keywords.
- Bookmarks and history features worked properly.

Assignment:

1. Open any web browser, Identify the following parts of the browser window, label each part.
 - Address Bar
 - Tabs
 - Back/Forward buttons
 - Refresh/Reload button
 - Home button
 - Bookmark button
 - Menu/Settings button
