

Introduction to MS Publisher

1. To understand the basic functions and interface of Microsoft Publisher.
2. To learn how to use templates to create publications.
3. To design and edit simple documents such as flyers, brochures, and cards.
4. To insert text boxes, images, shapes, and apply formatting.
5. To save, print, and export a publication.

Microsoft Publisher is a desktop publishing application used to create professional-quality documents such as brochures, flyers, business cards, newsletters, posters, invitations, and certificates. It provides pre-built templates and an easy drag-and-drop interface for beginners.

In the IICT course, learning MS Publisher helps students develop basic design and layout skills necessary for academic and professional communication. This experiment introduces students to the MS Publisher interface, tools, templates, and steps for creating simple publications.

Key Features of MS Publisher

- **Templates:** Ready-made layouts for flyers, newsletters, brochures, certificates.
- **Text Boxes:** Used to insert and format text anywhere on the page.
- **Picture Tools:** Insert and modify images, backgrounds, and shapes.
- **Layout Guides:** Helps maintain alignment and structure.
- **Design Checker:** Reviews documents for layout errors.
- **Export Options:** Save as PDF, image, or print-ready format.

Advantages of MS Publisher

- Easy for beginners
- Allows creative designs
- Provides advanced layout tools
- Helps create professional documents without graphic design skills
- Useful for small businesses, students, and offices

Procedure

Starting MS Publisher

1. Open **Microsoft Publisher**.
2. Choose **Blank Page** or select a **Template** (e.g., Flyer, Brochure, Card).

Working with Templates

1. Select a template category such as **Flyers** or **Brochures**.
2. Choose any template design.
3. Click **Create**.

Editing Text

1. Click on any existing text box.
2. Replace template text with your own.
3. Use the **Font**, **Size**, **Color**, and **Format** options from the toolbar.

Inserting Elements

- **Text Box:** Insert → Draw Text Box
- **Pictures:** Insert → Pictures → Choose an image
- **Shapes:** Insert → Shapes → Select shape
- **Background:** Page Design → Background → Choose style/color

Page Layout

- Use **Guides** and **Rulers** for alignment.
- Adjust margins in **Page Design** → **Margins**.

Saving and Exporting

1. Go to **File** → **Save As**.
2. Choose location and file name (e.g., MyFlyer.pub).
3. To export as PDF: **File** → **Export** → **Create PDF/XPS**.

Assignment:

Design a Simple Flyer Using MS Publisher

Instructions:

You must create a one-page flyer using MS Publisher with the following details:

1. **Open MS Publisher** and choose a **Flyer Template**.
2. Replace placeholder text with:
 - Event Name: Project Expo 2025
 - Venue: CSE - *DUET*
 - Date & Time: December 09, 2025, 10:00 AM
 - Description: *A full day of competitions, awards.*
3. Insert at least **one image** related to Event (e.g., Circuit diagrams, software/hardware, logo).
4. Add a **shape** (e.g., a banner or star) highlighting “All Students Welcome”.
5. Change the background color or design.
6. Format the text with appropriate **fonts, sizes, and colors**.
7. Save the file as **ExpoFlyer.pub**.
8. Export the final design as **ExpoFlyer.pdf**.
