

Syed Abdul Rehman – 25F-CY-105

Lab #10

Objective:

To develop a basic understanding of how the Internet works.

Abstract:

In this lab, we explored what the Internet is, how it functions, and how browsers help us access online information.

Procedure:

1. Open any web browser.
2. Navigate through different menus, settings, and features.
3. Practice opening multiple websites and tabs.

Assignment:

Write a short note explaining what the Internet is and list any three web browsers.
