

Lab #12

Objective:

Introduction to MS Access and designing a basic database structure.

Abstract:

This lab introduced Microsoft Access and guided us through creating a simple database along with a properly structured table.

Procedure:

1. Open Microsoft Access and select 'Blank Database'.
2. Enter a database name (e.g., StudentDB) and click Create.
3. Go to Create → Table Design.
4. Add fields such as RollNo, Name, Class, Section, Gender, ContactNo, and DOB.
5. Assign proper data types to each field.
6. Set RollNo as the Primary Key and save the table.

Assignment:

Create a table in MS Access with sample data for at least four students including RollNo, Name, Class, Section, Gender, ContactNo, and DOB.

Conclusion:

In this lab, we learned how to create a database and design a structured table using MS Access.
