

ICT IN E-COMMERCE

How technology supports online business

BY: SYED WASIF

WHAT IS ICT?

ICT means **Information and Communication Technology**.

- ICT means the tools used to store, process, and share information
- Includes computers, internet, software, networks, and digital systems
- ICT helps businesses work faster and smarter

WHAT IS E-COMMERCE?

E-commerce means **buying and selling products through Internet.**

- Popular platforms: Amazon, Daraz, Alibaba
- Customers can shop anytime, anywhere
- ICT is the backbone of all online business activities

WHY ICT IS IMPORTANT FOR E-COMMERCE

- Makes business processes quick and automated
- Improves communication between seller and customer
- Reduces cost of running a business
- Helps reach global customers

ICT TOOLS USED IN E-COMMERCE

- Websites and mobile apps
- Online payment systems
- Databases
- Cloud computing
- Digital marketing tools
- Customer support systems

ONLINE PAYMENT SYSTEMS

- ICT provides secure digital payment options
- Examples: Credit/debit cards, Easypaisa, JazzCash, PayPal
- Ensures fast, safe, and verified transactions
- Builds customer trust

INVENTORY & ORDER MANAGEMENT

- ICT helps track products in real-time
- Automatic stock updates
- Reduces errors and delays
- Makes delivery faster and more accurate

CUSTOMER SUPPORT THROUGH ICT

- Chatbots answer customers 24/7
- Email and messaging systems help solve issues quickly
- AI gives personalized recommendations
- Improves customer satisfaction and loyalty

ICT IN DIGITAL MARKETING

- Social media ads (Facebook, Instagram, TikTok)
- Search engine optimization (SEO)
- Email marketing
- Data analytics to study customer behavior
- Helps increase sales and business growth

CONCLUSION

- ICT is the heart of modern e-commerce
- Makes business faster, safer, cheaper, and global
- Without ICT, online shopping is impossible
- ICT will continue to make e-commerce smarter in the future

THANK YOU
