Organizational Behavior

15th Edition

by
Stephen P. Robbins
Timothy A. Judge

Introduction to Org Behaviour

- Soon you will be graduated.
- Soon you will work with people or
- Will manage people, no matter what your job, position, or stage in career
- You should know few things about Organization

Introduction to Org Behaviour

Organizational behaviour is defined as the ***systematic study*** and

application of knowledge

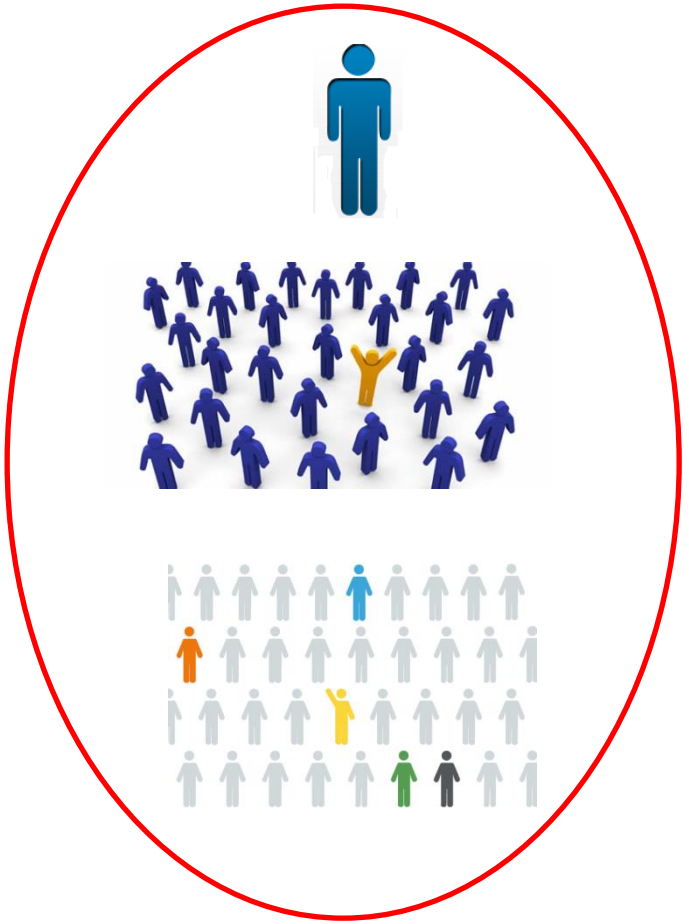

about ***how individuals*** and ***groups***

act within the ***organizations***

where they work.

Introduction to Org Behaviour

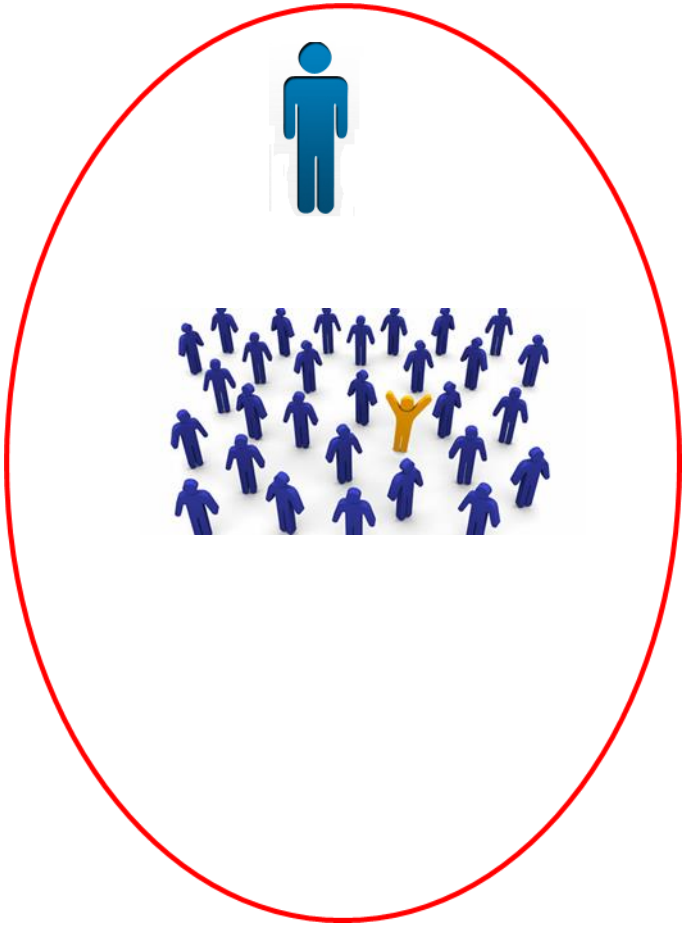

- There are ***three levels*** of analysis in OB
  - Organization (HIET)
  - the Group (Students, Faculty)
  - Individual (me, you)

Introduction to Org Behaviour

Example:

- if you want to understand **teacher's** personality, you would be examining the ***individual level*** of analysis.
- If you want to know about how teacher's personality affects this class, you are examining things at the ***team level***.
- if you want to understand how HIET's culture affects my teacher's behavior, you would be interested in the ***organizational level*** of analysis.

Introduction to Org Behaviour

Do you Know about behavior of these organization

Why Organizational Behavior Matters

- We would like to know ***about ourselves***,
  - What motivates us
  - When we feel highly energized
  - Condition/circumstance that demotivates us
- We would like to know same ***about others***
- OB help us understand the Organization and the groups we are working with.

Why Organizational Behavior Matters

- It can apply anywhere
  - At your home with family
  - With friends
  - Studying at University

Why Organizational Behavior Matters

- The individual
  - Job Satisfaction
  - Motivation
  - Empowerment
  - Ethics
  - Values
  - Attitude

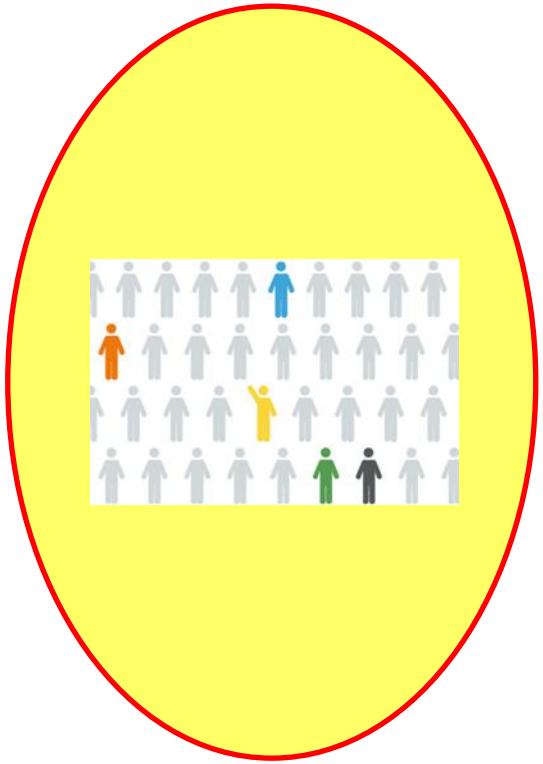

Why Organizational Behavior Matters

- The Group
  - Working together
  - Hidden Agenda
  - Conflicts
  - Diversity

Why Organizational Behavior Matters

- The Organization
  - Innovation
  - Quality
  - Productivity
  - Collaboration
  - Efficiency
  - High Performance Team
  - Globalization (challenge)
  - Work Environment

Why Organizational Behavior Matters

- Organizational Behavior can help you become a more ***engaged*** organizational member.
  - Getting along with others
  - Getting a great job
  - Lowering your stress level
  - Making more effective decisions
  - Working effectively within a team

Why Organizational Behavior Matters

Survey by the National Association of Colleges and Employers (NACE) asked employers ***which skills*** are the ***most important*** for them when evaluating **job candidates**.

- Communication skills
- Honesty/integrity
- Interpersonal skills
- Motivation/initiative
- Strong work ethic

Not their technical skills

Why Organizational Behavior Matters

- Research shows that ***successful organizations*** have a number of things in common, such as

  - Providing employment security
  - Utilizing self-managed teams
  - Being decentralized
  - Paying well
  - Training employees
  - Reducing status differences
  - Sharing information

Your OB Toolbox

Tools you can use today

Ideas to Consider

Higher quality Interactions with others

Increase value to Organization

Your OB Toolbox: Skill Survival Kit

- **Keep your skills fresh:** Consider revolutionizing your portfolio of skills at least every 5-6 years.
  - Do not get rusty.
  - Upgrade your skills regularly

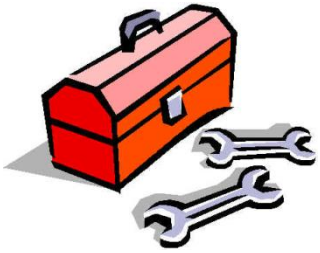

- **Master something:** Competence in many skills is important, but excelling at something will set you apart.

- **Embrace ambiguity:** Many people fear the unknown. They like things to be predictable. Unfortunately, the only certainty in life is that things will change.
  - Accept challenges
  - Take calculates risk

Your OB Toolbox: Skill Survival Kit

- **Network:** The term has been overused to the point of sounding like a cliché, but ***networking works***.
  - This doesn't mean that having 500 connections on, LinkedIn, or Facebook, but
  - it does mean that getting to know people is a good thing in ways you can't even imagine now.

- **Appreciate new technology:** This doesn't mean you should get and use every new gadget that comes out on the market,
  - you need to keep up on what the new technologies are and how they may affect you and the business you are in.

Let us do Common Sense Exercise

Ten ***True/False*** question about general things

Common Sense **Exercise**

1. Brainstorming in a group is more effective than brainstorming alone. **True/ False**
2. The first 5 minutes of a negotiation are just a warm-up to the actual negotiation and don't matter much. **True/ False**
3. The best way to help someone reach their goals is to tell them to do their best. **True/ False**
4. If you pay someone to do a task they routinely enjoy, they'll do it even more often in the future. **True/ False**
5. Pay is a major determinant of how hard someone will work. **True/ False**

Common Sense **Exercise**

6. If a person fails the first time, they try harder the next time. **True/False**
7. People perform better if goals are easier. **True/ False**
8. Most people within organizations make effective decisions. **True/False**
9. Positive people are more likely to withdraw from their jobs when they are dissatisfied. **True /False**
10. Teams with one smart person outperform teams in which everyone is average in intelligence. **True/ False**

Understanding Your ***Learning Style***

- If you notice that you retain more information by reading and seeing diagrams and flow charts, you may be a **visual learner**.
- If you primarily learn by listening to others such as in lectures, conversations, and videos, you may be an **auditory learner**.
- If you have a preference for actually ***doing things*** and learning from ***trial*** and ***error***, you may be a ***kinesthetic learner.***

Understanding Your Learning Style

- If you are a ***visual learner***
  - Draw pictures and diagrams to help you understand
  - Take careful notes during class so you can refer back to them later on
  - Summarize the main points of what you learn using charts

Understanding Your Learning Style

- If you are an ***auditory learner***,
  - Join study groups so you can discuss your questions and ideas and hear responses
  - Write down any oral instructions you hear in class right away
  - Consider taping lectures if your professor says it is OK and view online lectures on topics you are interested in

Understanding Your Learning Style

- If you are a ***kinesthetic learner***,
  - Schedule your homework and study sessions so you can take breaks and move around between reading your notes or chapters;
  - Take good notes during class—this will force you to pay attention and process information even when you feel like you are ***getting it***
  - Don't sign up for long once-a-week classes—they normally require too much sitting and listening time.

Understanding How OB Research is done

- Data Collection method
  - Surveys
  - Interview
  - Direct observation
- Researcher methods
  - Field Studies
  - Laboratory Studies
  - Case Studies
  - Meta-Analysis

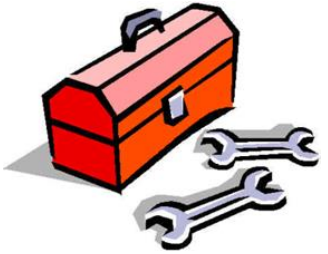

Trends and Changes

Ethical Challenges

- Business ethics refers to applying ethical principles to situations that arise at work.
- It feels like it's been one ethical scandal after the other. ***Enron*** , AIG, WorldCom, have all been examples of what can be described in terms ranging from poor judgment to outright illegal behavior.
- The immediate response by government has been the Sarbanes-Oxley Act (SOX) which went into effect in 2002. This act consists of 11 different requirements aimed at greater accountability, which companies must comply with in terms of financial reporting.

OB Toolbox: Take an Ethics-at-Work Audit

- **Do you integrate ethics into your day-to-day decisions at work?**
  - It's easy to think about ethics as something big that you either have or don't have, but the reality is that ethical decisions are made or not made each and every day.

- **Do you take the "front page" test when making important decisions at work?**
  - Thinking about how you would feel if the decisions you are making at work showed up on the front page of your local newspaper can help you avoid engaging in questionable behavior.

OB Toolbox: Take an Ethics-at-Work Audit

- **Do you role model ethics at work?**
  - Seeing others engage in unethical behavior is the start of a ***slippery slope*** when it comes to ethics.
- **Do you consider if rewards are distributed ethically at work?**
  - Situations in which there are "***haves***" and "***have nots***" are breeding grounds of unethical behavior.
  - If my salary is less, can I use official resource unethically?
- **Have you held a "risk brainstorm" at work?**
  - If you ask those around you if they see any situations that are challenging ethical behavior, you can uncover some seriously risky situations and avoid them.

Trends and Changes

Lack of Employee Engagement

- Studies suggest that fostering engagement, a concept related to passion, in employees has a significant impact on the corporate bottom line.

- Employee engagement is a concept that is generally viewed as managing discretionary effort, that is, when employees have choices, they will act in a way that furthers their organization's interests.

- An engaged employee is a person who is fully involved in and enthusiastic about their work.

Trends and Changes

Technology

- Technology has transformed the way work gets done and has created many great opportunities.
- The nexus of increasing personal computing power, the Internet, as well as nanotechnology are allowing things to be created that weren't even imaginable 50 years ago.
- Rate of technological change is not expected to slow down anytime soon.
- As computers get faster, new software is written to capitalize on the increased computing power.
- We are also more connected by technology than ever before.
- It is now possible to send and receive e-mails or text messages with your coworkers and customers regardless of where in the world you are.

Organizations Work Setting

Organizational culture

Organizational culture is defined as the Basic beliefs, assumptions, values and ways of interacting that influence the behavior of organizational members.

- It also Reflects the internal personality of the organization.

Organizations Work Setting

- Constructive culture
  - Members are encouraged to work together in ways that meet higher order human needs.
- Passive/defensive culture
  - Members tend to act defensively in their working relationships.
- Aggressive/defensive culture
  - Members tend to act forcefully in their working relationships to protect their status and positions.

Organizations Work Setting

- **Workforce diversity**
- Individual differences of organizational members, based on gender, race and ethnicity, age.

Organizations Work Setting

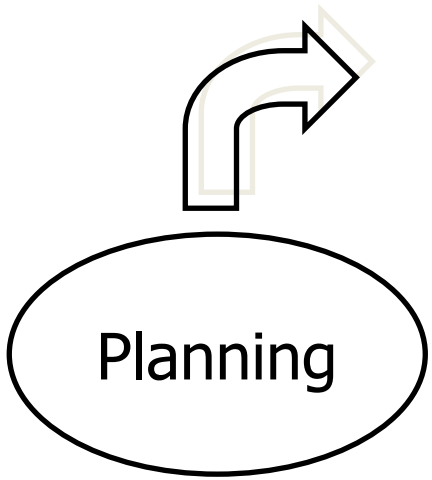

- **Multi-culturalism**
- Refers to inclusiveness, pluralism and genuine respect for diversity and individual differences.

Management Process

- Management in organizations is the function that ***coordinates*** the efforts of people to accomplish ***goals*** & ***objectives*** using ***limited*** resources efficiently and effectively.

- Management is defined as follows
  1) Planning
  2) Organizing
  3) Command / directing
  4) Controlling

Management Process

Goal
Strategy
Time
Money
Schedule

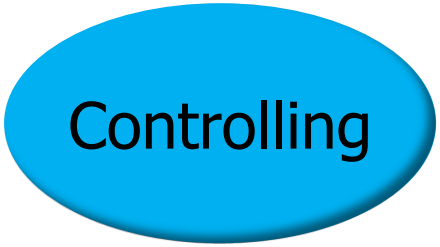

Allocating resource
Who will do what

Directing
Team &
motivation

Review and monitoring
evaluating progress

1- Planning

- **Project Manager** first needs to decide what tasks are necessary to perform to accomplish the goal.
- Steps may include
  - Specifications, and design,
  - Construction and testing
- These necessary steps are developed into a plan.
  - What is the boundaries of scope
  - Who are the people (skill-set of team)
  - What are agreed deliverable
  - Time needed etc.
- When the plan is in place, the **PM** can follow this plan to accomplish the goal.

2- Organizing

- Organizing involves *designating tasks* and responsibilities to ***project-team*** with the specific skill sets needed to complete the tasks.
- ***Assigning work*** and granting *authority* are two important elements of organizing (RACI matrix).
  - Who will do what?
- Organizational structure is the foundation; without this structure, the execution of *project* becomes difficult and unsuccessful.

2- Organizing - *technique*

2- RACI Matrix

- Team members are identified with variety of roles for various activities in a project
  - **[R]esponsible** does the work
  - **[A]ccountable** is the ***decision maker*** (only one)
  - **[C]onsulted** must be consulted prior to the work and gives input
  - **[I]nformed** means that they must be notified of the outcome

Figure 2–4: Sample RACI Matrix

Change Request Process	RACI
Executive Sponsor	A
Business Analyst	R
Project Manager	C
Developer	C
Tester	I
Trainer	I
Application Architect	C
Data Modeler	C
Database Analyst (DBA)	C
Infrastructure Analyst	C
Business Architect	R
Information Architect	C
Solution Owner	C
End User	I
Subject Matter Expert (SME)	C
Other Stakeholders	R, C, I (varies)

3 – Commanding / directing

- Once ***role*** and ***responsibilities*** are defined based for the available resource, you need to ***direct*** the team members ***what*** each individual has to do and ***how***.
  - Role has to be conveyed
  - Process must be defined
  - Expectations or performance criteria
  - Regular feedback on individual performance

4 - Controlling

- Control is an important function because it helps to check the errors and to take the corrective action so that deviation from standards are minimized.

- Control of an undertaking consists of seeing that everything is being carried out . .
  - in accordance with the plan which has been adopted
  - the orders/instructions which have been given
  - and the rules which have been laid down
