

1. CONVENIENT FOR STUDENT:

E-learning materials are self-placed and can be accessed any time the learner wants.

They do not require the learner to be physically present in a classroom. Students can also download and save the learning materials for future purposes from the system

2. LOWER COST:

E-learning is usually a cost-efficient way of learning for most students as they can choose from a large range of courses and make the selection depending on their needs. It can also be cost-efficient for many universities because once the learning platforms are setup, they can be reused for many sessions.

3. UP-TO-DATE LEARNING MATERIALS

* The study materials in e-learning systems can be updated more frequently than in the classroom-based education systems. Once the study materials are placed in the system, they can be updated without changing the whole materials and the materials can be available and reused for longer times.

4. WORLD-WIDE LEARNING SOCIETY E-LEARNING

The systems help in creating a worldwide learning society as anyone can access the study materials regardless of the geographical location. In the systems available now learners can also contribute to the study materials, which helps to keep the materials updated.

5. SCALABLE E-LEARNING SYSTEMS

- The number of students in virtual classes or e-learning systems can be very few or really high without causing any significant difference in the total cost

6. HIGHER DEGREE OF FREEDOM FOR STUDENTS

One may find it difficult at times to learn new ideas. E-learning systems provide the possibility for students to learn the same material repeatedly until they are satisfied.

7. BETTER RETENTION

- * The video and audio materials used in e-learning make the whole learning process more fun. This will help students to remember the things they learn for a long period of time. E-learning materials can also be accessed whenever wanted, thus the repetition makes the retention easier

THANK YOU ALL
