Questions on Page Nos: 1 To 8

Time allowed: 50 minutes

Negative marking: Yes

Grammar and Vocabulary Section

Q 1-16 Fill in the blanks with suitable words given at the end of the text.

My plane touched down at the airport on the tiny Caribbean island of Mystique late yesterday evening. "By the time I (1) _____ at the hotel, the sun (2) _____," I thought. My taxi whisked me from the terminal and (3) _____ its way through island streets crowded with busy shoppers.

My first impression of the Hotel Royale (4) _____ that it looked magnificent. While (5) _____ on the balcony of my hotel room, I (6) _____ a glorious view of the port and harbor. Myriads of colourful lights (7) _____ all along the shoreline. I (8) _____ with awe at the natural beauty of the island. The scene was enough (9) _____ my nerves and temporarily blot out all memories of the hectic schedules and office routines.

You can't imagine how close I am to nature now. The hotel (10) _____ by lush bougainvillea. Ornate fountains and cascading waterfalls help (11) _____ the air. What a contrast (12) _____ to my apartment back home! Nothing (13) _____ me here; neither the continuous ringing of the phone nor the buzz of traffic. There (14) _____ only a few cars on the island and I (15) _____ many calls. My trip to Mystique was a closely-guarded secret, (16) _____ only to my editor and very selected friends.

Q1

- A) will arrive
- B) arrived
- C) am arriving
- D) arrive

Q2

- A) will already set
- B) will have already set
- C) have already set
- D) had already set

Q3

- A) wound
- B) winds
- C) in winding
- D) had wound

Q4

- A) is
- B) were
- C) was
- D) will be

Q5

- A) relax
- B) was relaxing
- C) relaxing
- D) relaxed

PART - I (English)

Q6

- A) able to enjoy
- B) am able to enjoy
- C) was able to enjoy
- D) have been able to enjoy

Q7

- A) glistening
- B) glistened
- C) was glistening
- D) glisten

Q8

- A) have filled
- B) filled
- C) was filled
- D) will be filled

Q9

- A) soothing
- B) to be soothed
- C) soothed
- D) to soothe

Q10

- A) surrounded
- B) is surrounded
- C) was surrounded
- D) has surrounded

Q11

- A) will refresh
- B) refreshed
- C) to refreshing
- D) to refresh

Q12

- A) this are
- B) this was
- C) this is
- D) this were

Q13

- A) was going to disturb
- B) is going to disturb
- C) had disturbed
- D) is disturbing

Q14

- A) was
- B) had
- C) are
- D) have

Q16

- A) knowing
- B) is known
- C) was known
- D) known

Q 17-21 Choose the best option.

Forensic dentistry is the study and practice of aspects of dentistry that are (17) _____ to legal problems. It is a specialty practiced by few and is not usually part of dental education. Forensic dentistry is, however, of considerable legal importance for several reasons, one of the most important of (18) _____ is the fact that the teeth are the structures of the body most resistant to fire or putrefaction. (19) _____, the arrangement of the teeth or any restoration in them, is virtually or completely unique to any given individual and, if dental records can be found, may enable identification with certainty similar to (20) _____ provided by fingerprinting. The identification of human remains after aircraft accidents, for example, can often be made only by this means. Minor irregularities of the teeth can also be reproduced in bite marks, enabling a suspect to be identified (21) _____ he has bitten another person.

Q17

- A) relevant
- B) prevalent
- C) indifferent
- D) exact
- E) futile

Q18

- A) whom
- B) where
- C) which
- D) what
- E) that

Q19

- A) although
- B) moreover
- C) in addition to
- D) on behalf of
- E) since

Q 27-36 Select the best option.

The Phobia Awareness Week is to highlight the difficulties that many people (27) _____ in everyday situations. It is important to distinguish between a fear and a phobia. It's (28) _____ usual for all of us to have our own peculiar fears, for example being anxious around snakes or nervous about flying. However, only a very small proportion of us actually have a phobia of these things. When these fears begin to cause you embarrassment or you feel that your life is being disrupted then you would be wise to (29) _____ treatment for what could potentially be a phobia. By far the most (30) _____ phobia and potentially the most disruptive is agoraphobia. The word derives from Greek and (31) _____ means 'fear of the marketplace' but we apply it today to describe a distressing (32) _____ in which people (33) _____ going outside because of the awful feelings of anxiety that arise. Treatment of phobias usually consists of the patient (34) _____ behavioural therapy during which they gradually get used to being near the object or the situation that causes them fear. Drugs may be (35) _____ to treat anxiety and many people opt for alternative therapy such as acupuncture or hypnosis to help them come to (36) _____ with their fear and conquer it.

Reading Comprehension Section

Q 37- 45 Choose the best answer for each passage.

Q37

Huge beasts such as the dinosaur have never really become extinct. Mothra, a giant caterpillar who later becomes a moth, destroys Tokyo, and stars in the 1962 Japanese film named for him. Mothra is born, dies, and reborn regularly on classic movie channels. In Japan Mothra is one of the most popular films ever made. Mothra has survived the creation of more current scary creatures such as giant apes, extraterrestrial beings and swamp creatures. More than 30 years after his creation, Mothra still lives.

The main subject of the passage is

- A) the reasons that fads do not endure
- B) the lasting appeal of Mothra
- C) the difficulty of marketing good horror movies
- D) old models for creatures are still used because making new monsters is expensive

Q38

The Earth's past climate—including temperature and elements in the atmosphere—has recently been studied by analyzing ice samples from Greenland and Antarctica. The air bubbles in the ice have shown that, over the past 160,000 years, there has been a close correlation between temperature changes and level of natural greenhouse gases carbon dioxide and methane. One recent analysis from Greenland showed that at the end of the last glacial period (when the great ice sheets began to retreat to their present position), temperatures in southern Greenland rose from 5 to 7 degrees in about 100 years.

Air bubbles are not the only method of determining characteristics of the Earth's ancient climate history. Analysis of dust layers from ancient volcanic activity is another such method; as is the study of ice cores, which interpret past solar activity that may have affected our climate.

@DeveloperFaizMShah

IBA Past Entry Test Papers

Entrance With Faiz Shah

PART - I (English)

This passage states that:

- A) the Greenhouse effect is destroying the planet's atmosphere.
- B) temperatures in Greenland have been unusually stable over the past 100 years.
- C) there is more than one kind of information that scientists can use to determine the characteristics of the Earth's early climate.
- D) solar energy is the wave of the future.

Q39

French physicist Charles Fabry found ozone gas in the atmosphere in 1913. At room temperature, ozone is a colorless gas; it condenses to a dark blue liquid at -170 F. At temperatures above the boiling point of water, 212 F, it decomposes. Ozone is all around us. After a thunderstorm, or around electrical equipment, ozone is often detected as a sharp odor. Ozone is used as a strong oxidizing agent, a bleaching agent, and to sterilise drinking water. This gas is also highly reactive. For example, rubber insulation around a car's spark plug wires will need to be replaced eventually, due to the small amounts of ozone produced when electricity flows from the engine to the plug.

The passage implies that:

- A) Ozone is the result of pollution.
- B) High ozone levels in the atmosphere will cause large numbers of people to buy new car batteries.
- C) Ozone has no practical uses.
- D) Ozone is a natural part of the Earth's atmosphere.

Q40

Many people who have come close to death from drowning, cardiac arrest or other causes have described near-death experiences--profound, subjective events that sometimes result in dramatic changes in values, beliefs, behavior, and attitudes toward life and death. These experiences often include a new clarity of thinking, a feeling of well being, a sense of being out of the body, and visions of bright light or mystical encounters. Such experiences have been reported by an estimated 30 to 40 percent of hospital patients who were revived after coming close to death and about 5 percent of adult Americans in a nationwide poll. Near-death experiences have been explained as a response to a perceived threat of death (a psychological theory); as a result of biological states that accompany the process of dying (a physiological theory); and as a foretaste of an actual state of bliss after death (a transcendental theory).

The primary purpose of this passage is to:

- A) entertain
- B) persuade
- C) inform
- D) express disbelief in the afterlife

Q41

In most cases little birds lay little eggs. The kiwi is an astonishing exception to this rule--it is a smallish bird that lays a big egg. The kiwi, a flightless bird found in New Zealand, weighs about four pounds, and its egg weighs, believe it or not, about one pound. That is one-fourth of the bird's body weight! If an ostrich laid an egg that was in the same proportion to the ostrich as the kiwi egg is to the kiwi, an ostrich egg would weigh a whopping seventy-five pounds instead of the usual three pounds.

Which statement below best describes the organizational method used in this passage?

- A) description
- B) comparison/contrast
- C) chronological
- D) cause/effect

ALL ANSWERS MUST BE GIVEN ON THE ANSWER SHEET

PART - I (English)

Q42

Jazz is a peculiarly American contribution to Western culture. It was born out of the unique experience of American Blacks. Although its history is not entirely clear, jazz obviously has roots in the rhythm patterns and melodic lines of Africa, the tradition of Christian spirituals as sung by slave communities, the music of the blues as developed in the Deep South, and ragtime.

According to this passage, one can conclude that:

- A) Jazz is the sole Black contribution to Western culture.
- B) There is some difficulty tracing the origin of jazz.
- C) Jazz is most closely related to spiritual music.
- D) Jazz is not a complex musical form.

Q43

There are two kinds of jewellery that I do. There is commercial jewellery--class rings, necklaces, the kinds of things most people wear. I sell these items to meet my expenses for raw materials, supplies, and to make my living. The other, more creative work I do makes me feel that I am developing as a craftsman.

The author of this passage implies that:

- A) Artists are poor.
- B) There is no market for creative work.
- C) Commercial and creative work fulfills different needs for the artist.
- D) Rings and necklaces cannot be creative.

Q44

Some actors and rock stars are paid almost 100 times as much per year as school teachers. Not to downgrade the role of entertainment in our lives, but these people are not the valuable social resource that educators are. As another example, professional athletes earn vastly more than the nation's firefighters. Again, there is little doubt that the lower paid group contributes a more vital function to communities. Finally, dress designers, who can make up to \$50,000 for a gown, far out-earn police officers, whose very presence makes our cities and towns livable.

Based on this passage, the earning power in our society:

- A) is subject to staggering inflation.
- B) does not relate to one's usefulness in society.
- C) is highest among those whose achievements are the greatest.
- D) should be highest among actors and rock.

FAIZ SHAH

Q45

Did you know that a half-gallon milk container holds about \$50.00 in pennies? While all investment counselors realise that we must accumulate money in order to save, most recommend different kinds of investments for people who are in different stages of life. Older investors, those with limited funds to invest, or people with greater financial and family commitments, should take fewer risks. Younger, wealthier, and unmarried investors can afford to venture into the unknown.

Which of the following best describes the main idea of this passage?

- A) A penny saved is a penny earned
- B) Old people have the most money.
- C) Our ages and stages of life are part of what determines the investments that are best for us.
- D) Young people should concentrate on collecting pennies.

Q46 If $4(3x - 8) = 25$, what is $3x - 10$?

- A) 8
- B) 23
- C) 11
- D) 25
- E) None of these

Q47 The average of 21 numbers is 30. The largest number is 50. If we remove the largest number, then the average of remaining numbers will be

- A) 33
- B) 31
- C) 29
- D) 27
- E) None of these

Q48 Which of the following is equivalent to $3x^2 + 2x - 1$?

- A) $(3x + 1)(x + 1)$
- B) $(3x + 1)(x - 1)$
- C) $(3x - 1)(x + 1)$
- D) $(3x - 1)(x - 1)$
- E) None of these

Q49 If $b < 0$ and $|b| = 4b + 15$, then what is the value of b ?

- A) 3
- B) -5
- C) -3
- D) -4
- E) None of these

Q50 The measures of angles of a triangle if their measures are proportional to 4, 5 and 6 are

- A) $40^\circ, 50^\circ, 60^\circ$
- B) $30^\circ, 40^\circ, 110^\circ$
- C) $48^\circ, 60^\circ, 72^\circ$

Q51 In the given right angled triangle, $AB = 15$ inches and $BC = 10$ inches, what will be the length of side AC ?

Note: Figure not drawn to scale.

- A) 25
- B) 17
- C) $5\sqrt{13}$
- D) $\sqrt{300}$
- E) None of these

Q52 The perimeter of a triangle is 240. Its sides are proportional to 3:4:5. The largest side of the triangle is

- A) 80
- B) 120
- C) 60
- D) 100
- E) None of these

Q53 The grades of Javed in nine monthly tests were 58, 80, 56, 58, 64, 80, 56, 90, 80. The mode of his grades is

- A) 58 B) 80 C) 65 D) 90 E) None of these

Q54 The Arithmetic mean of two numbers is 20 and their standard deviation is 5. The numbers are

- A) 5, 15
- B) 15, 25
- C) 20, 20
- D) 20, 5
- E) None of these

Q55 If $a(b+c) = (b^2 - c^2) / d$ and $b > c$, then a is equivalent to

- A) $(b-c) / d$ B) $(b+c) / d$ C) $(b+c+d)$
- D) $-(b+c) + (b^2 - c^2) / d$ E) None of these

Q56 If $|W| < 25$ then

- A) $W < 25$
- B) $W > -25$
- C) $W < 25$ and $W > -25$
- D) $W \geq -25$
- E) $W \leq -25$

Q57 Area of a circle of diameter d is 100 square inches. The area of another circle of radius d is

- A) 200 square inches
- B) 100 square inches
- C) 400 square inches
- D) 25 square inches
- E) None of these

Q58 If $\sqrt{2x-3} + 10 = 11$, then value of x will be

- A) 9
- B) 10
- C) 2
- D) 15
- E) -3

Q59 The solution set of the following pair of linear equations is

$$x + 2y = 6; \quad x - y = 9$$

- A) $\{(6, 0)\}$
- B) $\{(0, 3)\}$
- C) $\{(8, -1)\}$
- D) $\{(9, -1)\}$
- E) None of these

Q60 The solution set of the equation $|x - 24| = 15$ is

- A) $\{(15, 24)\}$
- B) $\{(9, 39)\}$
- C) $\{(9, 24)\}$
- D) $\{(39, 54)\}$
- E) None of these

Q61 If $z = 3$ is a solution of the equation $5z^2 + kz - 30 = 0$, the value of k and other solution of the equation are respectively

- A) -5 and 2
- B) -5 and -2
- C) 5 and 2
- D) 5 and -2
- E) None of these

Q62 In the xy -coordinate plane, a straight line ℓ contains the points $(4, 2)$ and origin. If another straight line m contains the point $(1, 2)$ and is perpendicular to ℓ , then the equation of m is

- A) $y = 2x$
- B) $y = -2x$
- C) $y = -2x + 4$
- D) $y = 2x + 4$

- A) $A \subset B$ B) $A \cap B = B$ C) $B \subset A$
D) $A \cup B = A$ E) None of these

Q88 The value of $(3 - \sqrt{11})(3 + \sqrt{11})$

- A) $-2\sqrt{11}$ B) $-3\sqrt{11}$ C) $\sqrt{11}$
D) -2 E) $9 - \sqrt{11}$

Q89 If a whole number is divisible by 4, 5, 6, and 10, then it must also be divisible by

- A) 25
B) 40
C) 50
D) 60

PART - II (Mathematics)

- Q90 A certain amount of money m was divided into 3 parts in the ratio 2:3:4. If the difference between the maximum and minimum parts was Rs 5,000, then value of m is
- A) Rs 25,000 B) Rs 30,000 C) Rs 27,500
D) Rs 22,500 E) None of these
- Q91 If $\frac{x-1}{y} = \frac{x}{x+1}$ and $x \neq 0, -1$, then $y =$
- A) $\frac{x-1}{x}$ B) $\frac{x+1}{x}$ C) $\frac{x}{x+1}$ D) $x - \frac{1}{x}$ E) None of these
- Q92 Two dice are rolled together. The probability that both will show the identical numbers is
- A) $\frac{1}{6}$ B) $\frac{1}{3}$ C) $\frac{1}{2}$ D) $\frac{1}{4}$ E) None of these
- Q93 Which can be used to find the number w in the number sentence below?
- $$w \times 7 = 61$$
- A) $7 \div 61$ B) 7×61 C) $61 \div 7$ D) $61 \div 7$
E) None of these
- Q94 A piece of wire 80 centimetres long is bent to form a rectangle whose length is three times its width. The area of the rectangle thus formed is
- A) 200 square centimeters
B) 300 square centimeters
C) 400 square centimeters
D) 640 square centimeters
E) None of these
- Q95 If $a - 7 = b + 1$ then the value of $(a - b)^3 - (b - a)^3$
- A) 128
B) 256
C) 512
D) 1024
E) None of these
